## DEALER'S PRICE SUPPLEMENT

This Price Supplement contains prices on all Bilt-Well Millwork shown in our new Bilt-Well Design Book, also in Catalog No. 40.

All prices list except those otherwise shown.

For prices on all special millwork designs or for any material not shown in Price Guide, write for prices, and we will quote promptly.

## DELIVERY AND RETURNED GOODS

We will assist you in collecting your claims for damage and shortage or collect them for you, giving you FULL CREDIT, providing clear receipt for shipment is not given the Railroad Company or freight bills paid until you are sure every item has been received in good condition. In case of shortage or damage, always have the agent note same on freight bill.

In compliance with a ruling made by the Interstate Commerce Commission, Loss and Damage claims must be made in writing to the Railroads before SIX MONTHS have elapsed after making shipments or the Railroad Company will not pay them. In case you wish US to handle your claims, the expense bill and other necessary papers must be supplied us within FOUR MONTHS after shipment has been made or we cannot handle them for you.

NEVER RETURN any goods to us without first writing us regarding shipping instructions.

ALL STOCK MATERIAL purchased from us, if returned in good condition and merchantable, will be credited at the invoice prices less a SERVICE CHARGE OF 10% to cover cost of handling, inspection, restenciling, etc., after freight has been deducted.

No allowance will be made for odd or special work.

## PRICE GUIDE No. 55

Price Guide No. 55 is arranged for the convenience of the lumber dealer. We hope that you will become so familiar with the contents of this Guide that it will be your daily companion when pricing millwork items.

## BILT-WELL WINDOWS

Are made of clear, kiln-dried Ponderosa Pine, accurately machined to BILT-WELL STANDARDS, including BEVELED EDGE STILES and RAILS. They are TOXIC TREATED with an approved decay-resisting solution. GLASS is LUSTRAGLASS, carefully glazed. A special corrugation, added to the putty rabbet in machining, provides a putty binder which is an added protection against loose putty.

## PRIME ALL SASH PROMPTLY

CURRENT WATERPROOFING and TOXIC TREATMENT solutions, in our opinion provide only a temporary seal against the entrance of moisture. So it is important that all sash and windows be primed, including all edges of the sash and the putty, immediately after fitting or before exposure to moisture.

FOR INFORMATION ON OUR UNIQUE WINDOW UNIT refer to page 90.

**JIFFY-KLEEN***Modernizes***THE DOUBLE-HUNG WINDOW***A Window that is a Ventilating Window***WHERE USED ....**

The Jiffy-Kleen feature is attached to the window at the factory. When either sash is not tilted there is no change in the appearance of the window, no exposed metal or hardware. Hang Jiffy-Kleen Windows in any standard frame.

No change in size of either sash or frame.

Jiffy-Kleen, combined with our "Unique" unit, is the most up-to-date double-hung window available.

Jiffy-Kleen windows can be installed with any standard weatherstripping.

Jiffy-Kleen windows can be used for replacements without changing the present frame.

Clean the OUTSIDE as easily as the INSIDE, both upper and lower sash, WITHOUT REMOVING SCREEN or STORM SASH, in any kind of weather, when it needs it, same as you dust the furniture.

**WHAT IT DOES ....**

JIFFY-KLEEN SASH retain all the advantages of the old-fashioned double-hung window and, in addition, permit cleaning of the outside of the window from the inside of the room in any kind of weather, without removing screen or storm sash, and provide indirect ventilation in any kind of weather.

**THE COST ....**

Add \$3.39 List to the List Price of any two light window priced on pages 7-12, inclusive.

Write for circular on JIFFY-KLEEN VENTILATING WINDOW.

## BILT-WELL BASEMENT SASH and FRAME WITH HARDWARE . . . A Complete Unit

Design Book Page 54

INSIDE VIEW SHOWING HARDWARE

### BW-2860

This practical basement window is completely equipped with Screens, Hardware, Sash and Frame. It is given the "Bilt-Well" scientific process of chemically-treating the sash and coating the frame with aluminum protective liquid. Galvanized, rust-proof wire is applied on the screens. The hinges and locks of the sash also have a rustproof finish. The ventilating feature is unusually attractive because the sash is retained in an open position by a sliding slot in the hinges. This eliminates the unsatisfactory method of using a hook to hold the sash open. This wood window which is waterproofed and equipped with rustproof hardware leads the field of all basement windows. Condensation is prevented on all but the glass and this can be eliminated with the addition of "Bilt-Well" Cellar Storm Sash.

## BILT-WELL "CLOS-TITE" CASEMENTS

Design Book Pages 48-50

The vast improvement in Casements in both the design and construction has resulted in an increasing preference for this type of window. A recent survey shows that 49% of the six thousand people questioned prefer casements to other types.

Bilt-Well engineers have conducted lengthy experiments in the construction, and today, Bilt-Well "Clos-tite" Wood Casements are sealed against dust, rain and cold drafts.

Bilt-Well "Clos-tite" Casements are looked upon with pride as the ideal casement for present or future air-conditioned buildings. The frame is completely weatherstripped and the sash double-glazed. The auxiliary glass is framed in metal for easy handling and is held in the sash with thumb release fasteners. A moisture-proof gasket is used for sealing the installation of auxiliary glass to provide maximum insulation and reduce the transmission of air through the glass so essential for correctly air-conditioned buildings.

Bilt-Well "Close-tite" Casements are manufactured in standard sized units based on 8x12 and 12x12 lights of glass. All units with one light of glass in width are designed with 12x12 lights of glass. All other units have 8x12 glass. It is standard practice to divide the lights as illustrated in our "Schedule of Units," however, horizontal muntin bars can be furnished on special order.

Circle, instead of square head transoms, may be specified with standard Units. The bars in the circle head transoms are of zinc metal and harmonize very nicely with the wood bars in the sash below.

**Important!** Be sure to specify which sash are to be hinged to swing. One or more sash in multiple openings may be furnished stationary. Bilt-Well "Clos-tite" Casements are designed for out-swinging sash only.

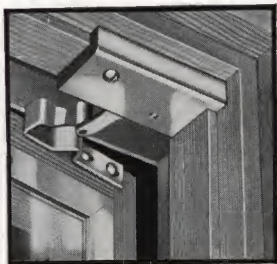

## BILT-WELL "CLOS-TITE" CASEMENTS

Window cleaning is greatly simplified for the housewife with Bilt-Well "Clos-tite" Wood Casement as the outside of the glass can be cleaned from the inside of the room. The builder, too, finds it advantageous to use Bilt-Well "Clos-tite" Wood Casements because they are furnished complete—ready to install. All hardware is furnished and attached. Insect screens and sash are prefitted and the frame is weatherstripped. Every detail has been given careful study so that Bilt-Well "Clos-tite" Casements will prove practical, durable and economical.

CORNER HINGE

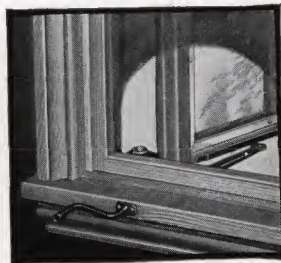

VIEW SHOWING CLEANING FEATURE

TOP CLOSER

LOCKING HANDLE

GEAR OPERATOR

The frame is put together with tongued and grooved joints at the mullions and transom bars as well as at the intersection of head, sill, and side jambs. The sash are mortised and tenoned at the corners, which is one of the many reasons why Bilt-Well "Close-tite" Casements have lasting qualities. The high-grade hardware furnished with Bilt-Well "Close-tite" Wood Casements is illustrated above. This is made of die-cut steel cadmium plated—fully protected against rust. All parts subject to wear are fitted with brass bushings. Corner Extension hinges are attached to the side jamb of the frame and to corners of the sash, as a special protection against any possibility of sagging. The locking handle and the top closer are used to draw the sash in contact with the weatherstripping to prevent air leakage. These serve a similar purpose and are optional equipment; however, it is recommended that both should be used for all casements of more than four lights high. Bilt-Well "Clos-tite" Wood Casements are regulated either in an opened or closed position with a removable crank and a gear operator. This equipment is placed under the stool and makes a neat and an attractive installation which is easy to clean.

For each swinging sash.....	\$1.68
For each stationary sash.....	1.32
For each transom sash.....	.84

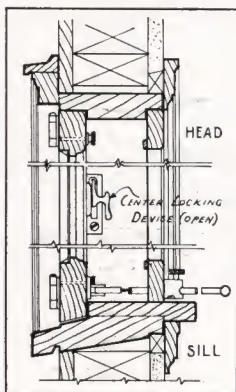

## BILT-WELL "CLEAN-E-ZE" CASEMENT UNIT

### A PRACTICAL CASEMENT UNIT AT A MODERATE PRICE

Design Book Page 52

EXTERIOR VIEW

A screen rabbet is provided on the inside for installing screens. The use of interior screens does not interfere with the operation of the sash as the bar of the operator passes through the bottom rail of the screen.

Screens can be replaced by storm sash in winter. Bilt-Well Clean-E-Ze Casement Units can be furnished with or without weather stripping.

Page Forty-eight

Bilt-Well "Clean-E-Ze" is an out-swinging casement designed as a low-priced unit. Is efficient, easily operated, substantial, and adaptable to any type of construction. It combines many features found in the higher priced units.

The hinge used is a combination three-leaf butt and surface hinge mounted to sash rail instead of stiles, thus preventing possibility of sagging. Hinge is arranged to answer the same purpose as the extension hinge—that of cleaning the exterior face of glass from inside. The sash is disengaged from middle leaf by simply turning two thumb screws, allowing it to swing around so that outside becomes easily accessible for cleaning. This is an exclusive and very important feature with Bilt-Well Clean-E-Ze Casement.

The operator used is of the bar type. Adjustable, easily installed, has no parts to get out of order, will hold sash rigid in any position, and acts as a locking device when the sash is closed. In addition, an inexpensive lever-locking device can be installed at the side jamb.

INTERIOR VIEW

## LIST PRICES ON "CLEAN-E-ZE" CASEMENTS

The following prices on "Clean-E-Ze" Casement Units are based on 6 light sash  $1\frac{3}{8}$ " thick, glazed S. S. B., frames with  $1\frac{3}{8}$ "x $5\frac{1}{4}$ " jambs,  $1\frac{1}{8}$ "x $4\frac{1}{2}$ " outside casings or  $1\frac{1}{8}$ "x2" brick moulds, solid sills, plain cap. Frames are put together. Sash and frames W. P. P. Weatherstripping Spring Bronze Type.

4½" Bottom Rail     7½" wood in height     4¼" wood in width

Two light storm sash standard opening for 2 light check rail window divided four light where glass width of window is under 28" wide, add 48c list. 28" and wider, no additional charge.

Ventilators cut in top or bottom rail, add each.....\$0.30

For swing light ventilators in divided light storm sash (no hardware), add each ..... 1.35

For swing light hardware add per light..... .69

Storm sash rabbetted to fit frames with ⅞" outside casing, add per sash.... .30

Cottage storm sash in pairs and rabbetted for convenience in storing, add per pair ..... .30

Minimum charge for rabbetting on any order..... .84

### BILT-WELL MILLWORK

As manufacturers and jobbers we make every effort possible to insure Bilt-Well Millwork reaching the dealer in perfect condition. A few little suggestions will help maintain the high quality of our millwork.

- Avoid storing in damp buildings.
- Avoid storing against outer walls without ample air circulation.
- Do not deliver to building until plaster is thoroughly dry.

## CARE OF VENEERED DOORS

Veneered Doors are guaranteed to be of good material and workmanship. However, they must be accorded reasonable treatment by the purchaser, and must not be placed in damp warehouses, moist or freshly plastered buildings, or subject to abnormal heat or dryness as we cannot assume responsibility for defects resulting from these causes. Top and bottom edges of all doors must be thoroughly painted or varnished to prevent absorption of moisture.

## MIRROR DOORS

Design Book Page 75

A Mirror Door adds greatly to the convenience and appearance of the home. It is equally appropriate in the dressing room and reception hall.

We use commercial quality plate glass mirrors in our mirror doors.

The following list prices are to be ADDED to price of panel doors for mirrors, glazing and converting.

One Panel Design with  
Wide Stiles and  
Rails

5 X Panel

## COMBINATION DOOR EXTRAS

(Special sizes made to order are always made exact size ordered.)

- For irregular or intermediate sizes use price of next larger listed size and add ..... 60%
- For doors wider than listed sizes, add 60% to price of 3-0 door of same height and add for each extra 6 inches or fraction thereof in width.....\$2.10
- For doors higher than listed sizes, add 60% to price of 7-0 door of same width and add for each extra 6 inches or fraction thereof in height..... 1.95
- For doors both wider and higher than 3-0x7-0, add 60% to price of 3-0x7-0 door and add for each 6 inches or fraction thereof:
  - Extra width ..... 2.10
  - Extra height ..... 1.95
- For doors  $1\frac{3}{8}$  inches thick add to a list of a door  $1\frac{1}{8}$  inches of same size.. 15%  
Combination doors  $1\frac{3}{8}$  inches thick are furnished with screen and storm panels  $1\frac{1}{8}$  inches thick.
- For Plain Red Oak Combination Doors, add to price of W. P. P. door of same size and thickness..... 90%
- For making Combination Doors with curved top add in addition to Rule 1:
  - Segment Top .....\$ 7.50
  - Circle Top ..... 10.50

## BILT-WELL "UNIQUE" FRAME

Equipped with "Unique" Balances

EXTERIOR VIEW

The acceptance of "Unique" Sash Balances for Bilt-Well "Unique" Frames is the outcome of an extensive search for a dependable mechanical Sash balance. Their simplicity make them, obviously, very dependable. Bilt-Well "Unique" Frames offer all of the modern advantages of narrow-line casings, narrow-line mullions, and larger glass areas which admit an abundance of natural sunlight.

The weatherstripping of this complete unit is very efficient and unusually practical. The sides of the window have an interlocking-type strip which remains 100% efficient during expansion and contraction of the sash and frame. The top, bottom, and check rails are equipped with a compression-type weatherstripping which also assures an all-year-around protection against dust, rain, and windstorms.

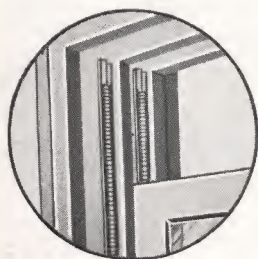

Illustration showing "Unique" Balance in place.

Bilt-Well "Unique" Frame is one frame adapted to 2"x4" stud, stucco, brick veneer or masonry wall.

Prices quoted upon application.

There is an increasing amount of preference among builders and dealers for Bilt-Well "Unique" frames.

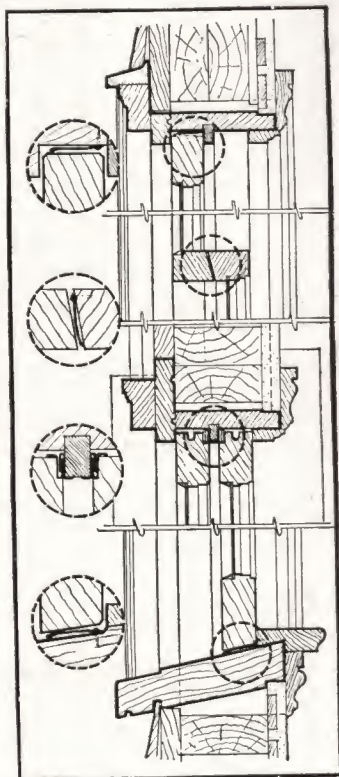

Actual comparisons have proved such superior features as attractive narrow-lines, wide blind stops, and "Unique" construction throughout.

The entire frame is constructed of thoroughly kiln-dried, clear W. P. Pine.

Pulley Stiles and Head Jambs are  $\frac{3}{4}$ "x $4\frac{1}{2}$ ".

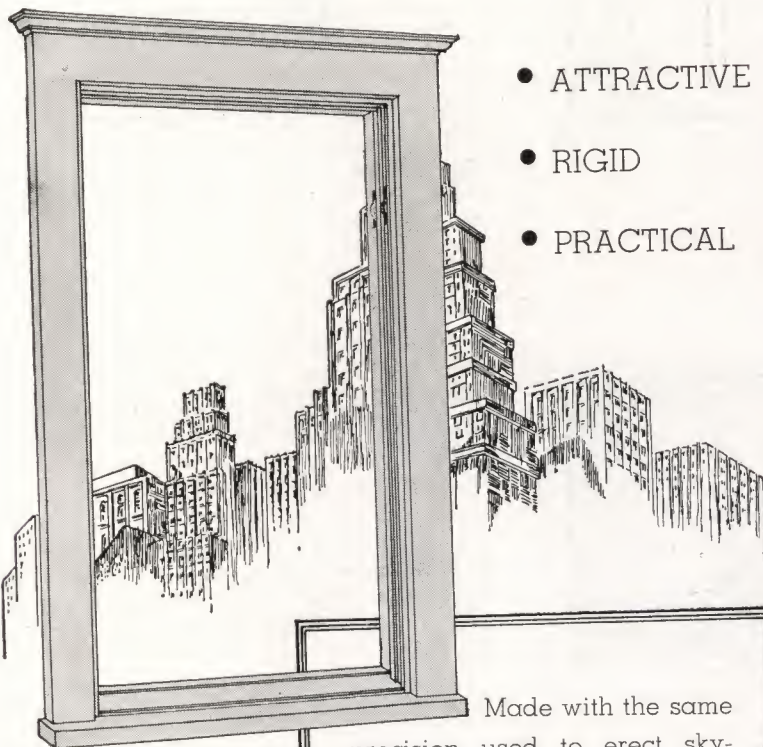

Blind Stops are  $\frac{3}{4}$ "x $3\frac{1}{8}$ " at sides, and  $\frac{3}{4}$ "x $1\frac{1}{4}$ " at head.

The Sill is  $1\frac{1}{8}$ "x $7\frac{1}{8}$ " with ample pitch for good drainage.

## BILT-WELL Standard Air-Lok FRAMES

W. P. P. or Fir  
K-D or Set Up—Solid Sill

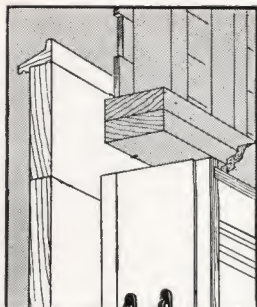

- ATTRACTIVE
- RIGID
- PRACTICAL

BILT-WELL  
MILLWORK

Made with the same precision used to erect skyscrapers. Side Jambs are dadoed into the head, and sill is dadoed into Side Jambs. Pulley stiles tongued and grooved to blind stop.

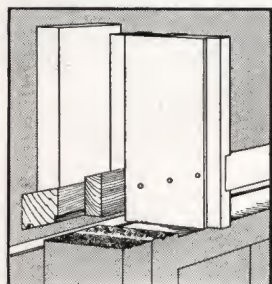

Bilt-Well Standard Air-Lok Frames are furnished with pulleys for weights and cords; however, any standard mechanical sash balancing device such as "Unique" can be furnished and will give satisfactory service. Weatherstripping of any standard brand can be likewise installed in Bilt-Well Standard Air-Lok Frames.

# 8 Points of BILT-WELL Window and

1

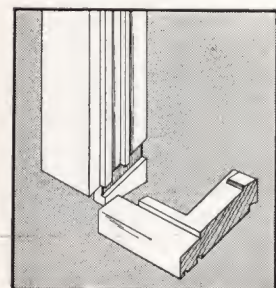

1—Side Jamb's dadoed into Head Jamb permit placing header one-quarter inch above frame; thus the finished head casing covers cracked plaster caused by the header. To homebuilders this is of vital importance.

2

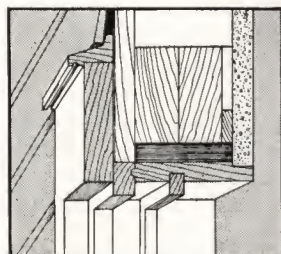

2—Sill is dadoed into Side Jamb's which have lugs to rest on plate to eliminate blocking-out under frame and to simplify setting frames plumb. This results in a substantial saving in the cost of installation.

3—Sill fits snugly into rabbet in Side Jamb's, a construction that is practical, durable and entirely free of places where water is likely to become trapped.

3

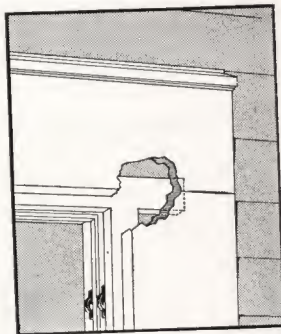

4—Blind Stop, Pulley Stiles and Head Jamb's are joined with a tongue and groove. Drip Cap has water drip groove and leak-proof rabbet joining the head casing.

4

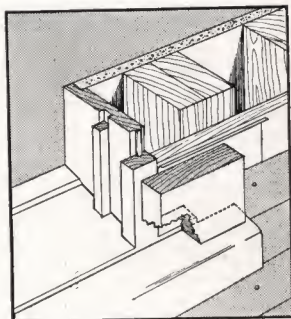

# Superiority in Standard Air-Lok Door Frames

5—The Blind Stop carried across the head joins the sheathing and covers the joint where Head and Side Casing intersect. This prevents the influx of air through the weight box.

5

6—The Double Lug and Rabbet on sill, butts against the back of casing, sealing the joint weather-tight where Casing and sill intersect.

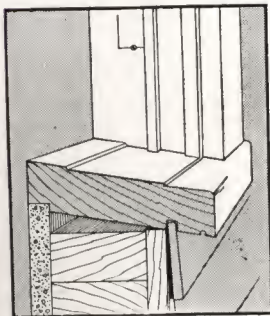

6

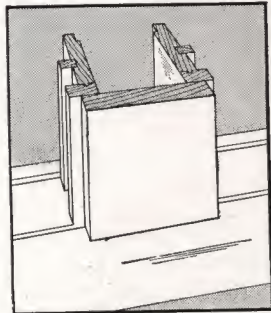

7—Side Jambs of Mullion fit into dado of sill which is one piece in length the entire width of the opening.

8—Sill pitches two inches to a foot to insure perfect drainage and is rabbeted on back edge for a tight joint where plaster intersects. In addition to this, rabbets on top of sill form a weather-tight joint where storm sash and sash proper intersect.

Bilt-Well Air-Lok Door Frames are furnished with weather-tight joints identical in the fulfillment of protection against drafts with that of Bilt-Well Air-Lok Window Frames. Therefore, when ordering window frames include a sufficient quantity of Bilt-Well Air-Lok Door Frames to complete orders.

6-0	.42	.57	.78	.90					

For double, triple or quadruple window trim use above figures for each single window opening. Single sash and casement sash trim take price of next larger window opening.

**Brick Veneer Trim**—(2x4 Studs). For 4 1/4" stool and 2 1/4" stops add to complete trim set prices: Y. P. or W. P. P., 30c; Uns. Gum, 39c; Pl. Red Oak, 54c.

## THE BILT-WELL DOVETAIL MITERED CORNER

Makes a perfect joint on any of our stock BILT-WELL TRIM DESIGNS which are shown on the preceding pages.

This newly invented dovetail mitered joint is outstanding in both simplicity of design and practicability of construction. The simple manner in which it is assembled at the job is of vital importance to the Builder because of a lower installation cost.

Everyone is familiar with the strength of a dovetailed joint, and since this is the principle employed in the construction, there is already sufficient assurance that it will form a permanent joint between the head and side casings. Various experiments have proved that the joint will not open up even though the wood is shrunk by forceful methods of drying—it is held there and there to stay.

## THE BARCOL OVERDOOR

Design Book Page 65

BW-3230  
MODELS No. 50 AND 75

The Barcol OVERdoor is an improved overhead door, suitable for residence and public garages, service and greasing stations, warehouses, factories, loading platforms, boat-houses, terminals and similar structures. It will be found extremely adaptable for remodeling work as well as new construction.

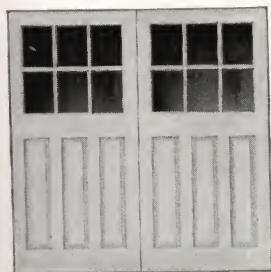

It occupies a minimum of valuable floor and wall space, is overhead and out of the way when open, is not affected by any kind of weather, and allows full use of the entire door opening at the top and sides. It may be had in special designs to conform to the architectural style of the building.

Special features of Barber-Colman design insure a weather-tight fit on all four sides when closed, unusually easy operation, enduring service without twisting or sagging, and low maintenance cost.

In the long run, the Barcol OVERdoor will be found the most economical door that can be purchased. Because of its sturdy construction and the low cost of keeping it in proper operating condition, it will outlast other kinds of doors.

In addition to the Barcol OVERdoor, we have a complete line of Electric Door Operators for swinging, sliding, and overhead doors; also controls for use with these operators, including switch control, time control, "electric eye" control, and also RADIO control.

The Barcol OVERdoor can be furnished in any size to meet almost any condition. Send for literature and prices.

## BILT-WELL "NU-STYLE" KITCHEN KABINET

### Sectional Units

Patent No. 97309

Design Book Pages 110-116

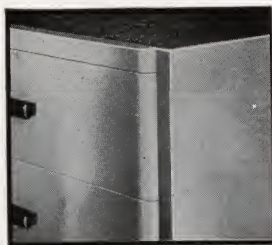

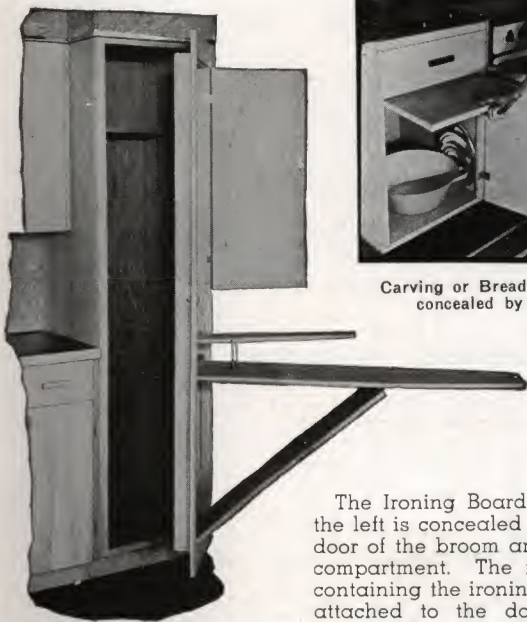

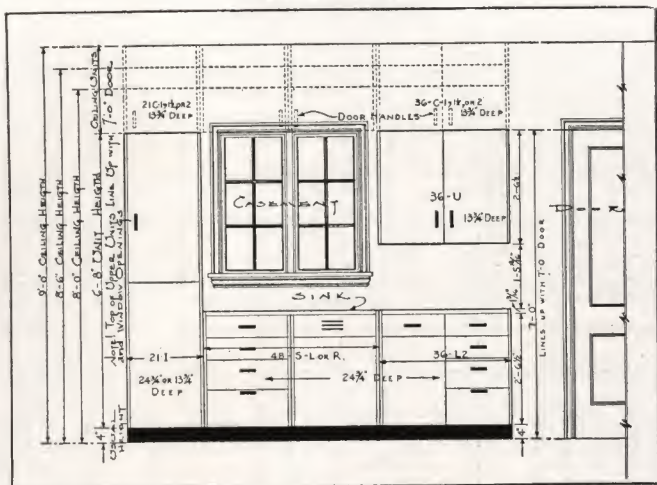

These are outstanding examples of beautiful, economical and practical Kitchen Cabinets. The colors . . . the simplicity . . . the attractiveness and the new style are in perfect harmony with new stoves, refrigerators, and kitchen decorations. The Lumber Dealer has never before been offered a line of cabinets which so completely meet all demands of the modern kitchen. The kitchens shown here are typical of many where Bilt-Well "Nu-Style" Kitchen Cabinets are installed. All of these are developed with standard Units selected from a dealer's stock of interchangeable sizes.

Bilt-Well "Nu-Style" Kitchen Cabinets are manufactured in sectional units. High-grade materials, good workmanship, and fine construction are made available for the majority of home owners because these cabinets are standardized and produced in large quantities. This method of manufacturing enables the builder, the architect, and the housewife to use Bilt-Well "Nu-Style" Kitchen Cabinets because of the economy offered. A record of past sales shows that these cabinets are in great demand for modernizing old kitchens as well as furnishing new homes. This is one of the many reasons why Bilt-Well "Nu-Style" Kitchen Cabinets offer the Lumber Dealers wonderful sales possibilities.

A choice of three colors is offered when cabinets are ordered enameled. These are "Modern Green," "Lustrous Ivory," and "Sanitary White." Factory painting should always be recommended to insure entire satisfaction. Today's conception of decoration involves the use of larger solids of color and it is now considered good taste to have the cabinets finished in an appropriate color different from the walls, windows, and doors.

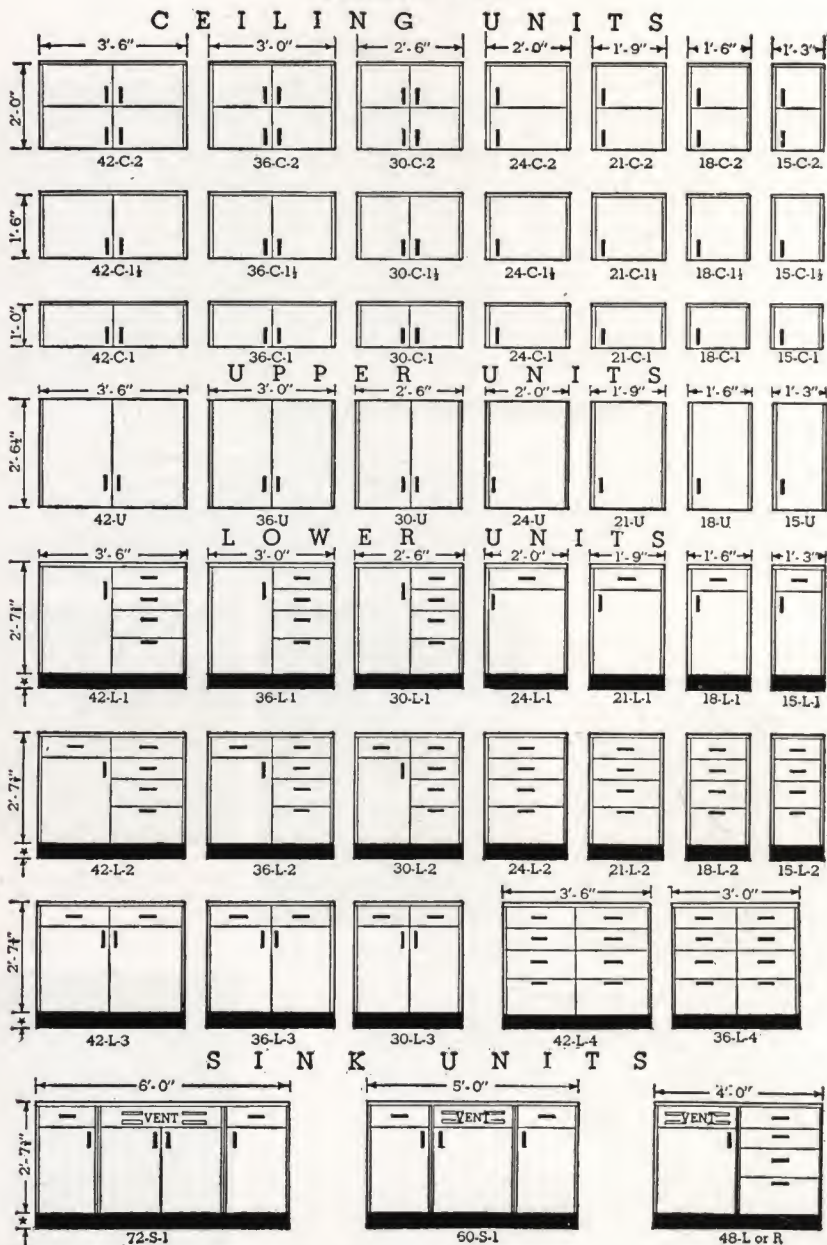

Patent No. 97309

# BILT-WELL "NU-STYLE" KITCHEN CABINET

## Sectional Units

Patent No. 97309

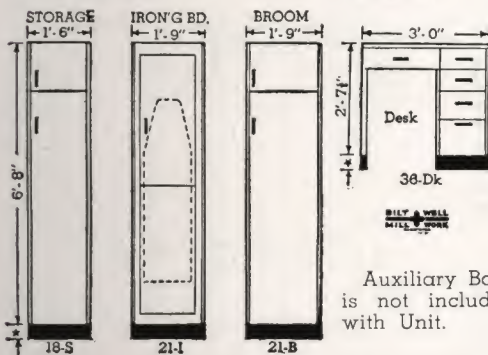

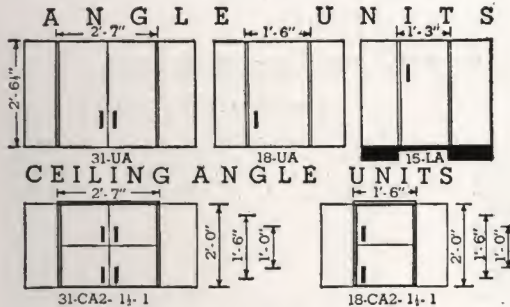

Depth of above units is given on the following page. It is not necessary to build a special recess space to install these cabinets. They are mounted on the surface of the walls with screws anchored to the studding. This makes an economical installation.

## BILT-WELL "NU-STYLE" KITCHEN KABINET

## Sectional Units

Patent No. 97309

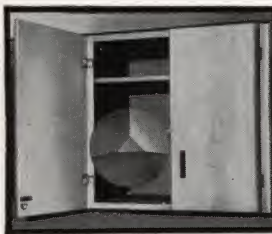

Auxiliary Base  
is not included  
with Unit.

Bilt-Well "Nu-Style" Kitchen Cabinets have many outstanding, practical features, in which all dust-collecting frills are completely eliminated. The counter top, drawers, and doors overlap the framework, forming a dust-proof enclosure. The shelves are easy to clean because a triangular block has been placed in the corners. The drawer and door handles are placed where they are easy to reach.

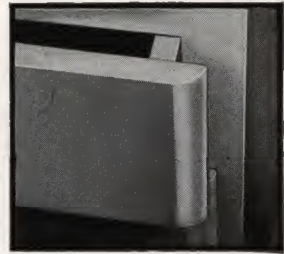

A new idea of a work-top is introduced with these cabinets. It is a combination top consisting of fabricated wood and inlaid linoleum surface. This top may be used with Porcelain Enameled Iron, Monel Metal, Stainless Steel, or Linoleum Composition Sink. Special accessories, as spice racks, cash trays, metal flour and sugar bins, may be ordered installed in Upper Units. Lid racks, metal bread and cake drawers, cutlery and silver trays, may be ordered with the Lower Units.

Interlocking Joint on drawer front (seen from bottom of drawer).

Magnified inset of Triangular Block in corners of shelves.

Overlapping drawer and door—forming dust-proof enclosure.

The auxiliary base, or the black strip shown on the bottom of the lower units, is not included with the cabinets unless ordered. It does not require machine fitted joints and, therefore, can be installed with the use of ordinary lumber 1x4 size. To provide ample toe room, the auxiliary base should not project from the wall more than  $22\frac{3}{8}$  inches. This usually continues the entire length of the group and the lower units set directly on this base.

Depth of all ceiling units, 1 ft.  $1\frac{3}{4}$  in. deep (over all), except 21-C-2, 21-C-1 $\frac{1}{2}$ , 21-C-1, 18-C-2, 18-C-1 $\frac{1}{2}$ , and 18-C-1, 26-C-1 $\frac{1}{2}$ , and 42-C-1 $\frac{1}{2}$ , which are 2 ft.  $\frac{3}{4}$  in., or 1 ft.  $1\frac{3}{4}$  in. depths. All Upper Units, 1 ft.  $1\frac{3}{4}$  in. deep over all. All Lower Units, 2 ft.  $\frac{3}{4}$  in. deep over all. All Sink Units, 2 ft.  $\frac{3}{4}$  in. deep over all. All Ceiling Upper Angle Units (31UA and 18UA)—1 ft., 1 in. at the sides. Lower Angle Unit 15LA, 2 ft.  $\frac{1}{4}$  in. at the sides. Special Units, No. 21-1 is 2 ft.  $\frac{3}{4}$  in. deep over all. Nos. 21B and 18S are 1 ft.  $1\frac{3}{4}$  in., or 2 ft.  $\frac{3}{4}$  in. deep over all. The Auxiliary Base is not included with the Unit.

### **BW-4286**

Stair building is the most complicated of all millwork. If not properly done it will develop into mistakes often impossible to correct. Order "Bilt-Well" Stairs, planned and built under "Bilt-Well" Standards, then let the responsibility of satisfying your customers rest with us.

Design BW-4286 consists of:

Starting Newel BW-3958.  
Starting Tread BW-4070.  
Baluster BW-4000.  
Hand Rail BW-4082.  
String Bracket BW-4080.  
Tread BW-4090.  
Riser BW-4096.  
Cove BW-4098.  
Return Nosing BW-4094.

### **BW-4278**

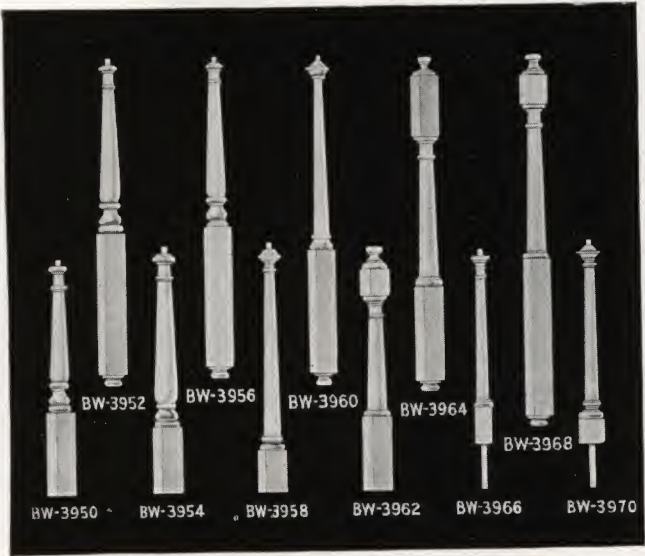

A stairway will do one of two things—either detract from the rest of the house, or give a pleasing impression which will reflect good taste. Bilt-Well Stairs are fashioned with a modern appeal and taken from authentic Period Designs. BW-4278 is the result of careful planning, good designing, and work of master craftsmen.

Design BW-4278 consists of:  
Stair Newels BW-3954, BW-3956.  
Gooseneck and Easing BW-4032.  
Baluster BW-4002.  
Starting Tread and Riser BW-4070.  
Hand Rail BW-4082.  
Tread BW-4090.  
Riser BW-4096.  
Cove BW-4098.  
Return Nosing BW-4094.  
String Bracket BW-4080.  
Starting Easement with Cap BW-3990.

## EXTRAS FOR WIDE LUMBER, ETC.

Wide Lumber—Glued for width, ADD 1" for waste to each 6" or part thereof in width, figuring even inches in width. Figure on basis of 8" stock and ADD per 1,000 ft. BM. for glueing.....	\$112.50
Surfaced 4 sides, ADD per 1,000 ft. BM.....	37.50
Sanded 1 side, ADD per 1,000 ft. BM.....	6.00
Sanding 2 sides, ADD per 1,000 ft. BM.....	9.00

Lumber thinner than 1" figure as 1" thick.

Intermediate widths, figure next larger even inch.

Intermediate lengths under 8'0", figure full feet. Over 8'0", figure even feet.

Wider than 12", except W. P. Pine, figure on glued up basis shown above, W. P. Pine wider than 24" figure as glued up lumber.

S4S or S2S lumber less than 4" in width figure on Special Moulding Basis.

## TENNESSEE RED CEDAR

No. 1 Common and Btr.

1" thick, 3" and wider, 3'0" and longer, per 1,000 ft. BM.....	\$150.00
Specified width and lengths when obtainable, add per 1,000 ft. BM .....	60.00
Wider than 6", figure as glued up lumber.	

## CEDAR CLOSET LINING

Carried in stock in cartons of forty square feet, per carton. Tongued and grooved and end matched, $\frac{3}{8}$ "x2 $\frac{1}{2}$ ", per 1,000 sq. ft.....	\$105.00
---	----------

**WOOD CONVERSION COMPANY****NU-WOOD****TERMITE TREATED**

An all-wood product

Full 1/2-inch thick

Extreme rigidity

3-way fiber structure

Waterproofed

Fine appearance

Uniform quality

Ease of working

Securely packaged

We, as jobbers, are carrying substantial stocks of the following Nu-Wood products.

**NU-WOOD SHEATHING**

25/32" thick, all sizes. Processed sealed against moisture and wind.

**NU-WOOD INSULATION BOARD**

1/2" thick, all sizes in regular Tan and some sizes in Old Ivory. Two distinct surfaces, smooth and rough texture.

**NU-WOOD BEVEL LAP TILE**

1/2" thick, all stock sizes in Rough Variegated, most sizes in Old Ivory.

**NU-WOOD LATH**

"V"-Joint.

**NU-WOOD BEVEL LAP PLANK**

Texture Surfaced, Variegated and Old Ivory. Widths 6", 8", 10", 12" and 16". Lengths in 6'0" 8'0", 9'0", 10'0" and 12'0".

**NU-WOOD WAINSCOT**

All practical sizes.

**NU-WOOD MOULDINGS**

All patterns.

**ADHESTIK**

1-Gallons

5-Gallons

**BEVIL-DEVIL GROOVING TOOLS AND BLADES**

## WOOD CONVERSION COMPANY

**Balsam Wool**

**Double-Sealed Insulation**

Sold by lumber dealers only

Moisture-proof

Vermin-proof

Fire-resistant

Securely fastened in place

Non-settling

We, as jobbers, are carrying substantial stocks of Balsam-Wool in thicknesses and widths as follows:

- $\frac{1}{2}$ " x 16"—packed 250 sq. ft. per roll
- $\frac{1}{2}$ " x 24"—packed 250 sq. ft. per roll
- 1" x 16"—packed 125 sq. ft. per roll
- 1" x 24"—packed 125 sq. ft. per roll
- Wallthick x 16"—packed 75 sq. ft. per roll
- Wallthick x 24"—packed 62½ sq. ft. per roll

Other sizes available on special order.

Ask the Wood Conversion Company representative to show and explain to you the new Balsam-Wool "Guaranty of Satisfaction to the Homeowner," which should be a large factor in increasing your insulation sales for the coming year.

Due to large stocks of Balsam-Wool which we maintain in our warehouse, we can assure you that all orders sent to us will be filled promptly.

## WOOD CONVERSION COMPANY

**TUFFWOOD**

The Multi-Purpose

Hard Board

DOES NOT Chip, Split, Warp, Crack, Swell, Curl.

Semi Tuffwood  $\frac{1}{4}$ "

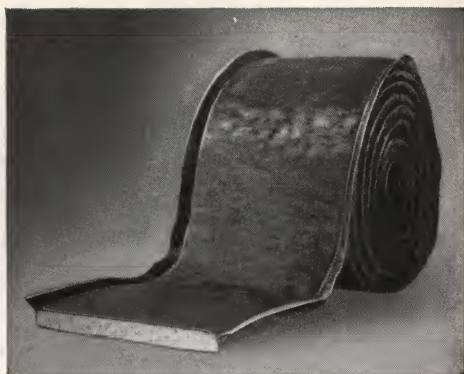

Standard Tuffwood  $\frac{1}{8}$ "

Tempered Tuffwood  $\frac{1}{8}$ "

Tempered Tuffwood Tile  $\frac{1}{8}$ "

We have substantial stocks of the above items in all sizes from which your orders will be promptly shipped.

## BALSAM-WOOL-SEALED INSULATION

As attic insulation you may sell Balsam-Wool Sealed Insulation under a guarantee of satisfaction or the owner's money back.

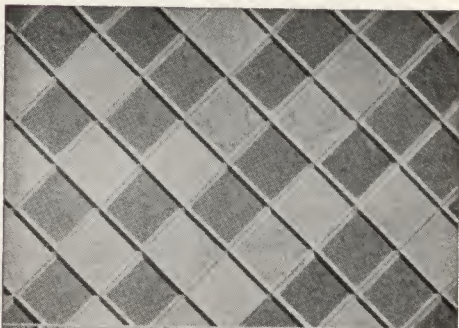

$\frac{1}{2}$  INCH AND 1 INCH BALSAM-WOOL-SEALED INSULATION  
Note nailing flanges—a secure method of application.

Usually confined to ceiling use.

### NU-WOOD PLANK

Nu-Wood Bevel-Lap  
Plank (Beaded) in Random  
Widths for Walls.

### NU-WOOD WAINSCOT

Nu-Wood Wainscot Hard  
Surface Material for Lower  
Walls.

For Colonial, Empire, English or other periods, Nu-Wood has a pattern that will fit.

**STAINED SHINGLE DIVISION**  
**WEYERHAEUSER SALES COMPANY**

Manufactured from Western Red Cedar under the supervision of expert graders. Each shingle meets the specifications of 100% Vertical Grain (even, parallel grain that will lay flat), 100% Heartwood (containing highest percentage of decay-resisting natural oils). Through the exclusive Edham's process, true mineral colors are made an integral part of the shingle.

Edham products are illustrated and further described in special literature and such information as manufacture, application, reference charts, are included in the Edham Reference Manual. This literature, as well as shingle pads and individual hand split or shingle samples, is available upon your request without obligation.

We, as jobbers, are carrying large stocks of Edham Stained Shingles in our warehouse from which we can fill orders promptly.
